PROFESSIONAL SUMMARY

Senior Engineer with 5+ years of experience building and scaling production web applications. Strong in front-end architecture with React and Next.js, with hands-on ownership of Node.js microservices, APIs, caching, and event-driven workflows. Led a major SSR migration project that improved PageSpeed, reduced bounce rate, and increased conversion rate. Experienced in taking complex features from design and implementation through performance optimization and production rollout.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Frontend:** React.js, Next.js, React Native, Shopify Hydrogen
- **Backend:** Node.js, Express.js, REST APIs, Microservices
- **Datastores:** PostgreSQL, Redis
- **Cloud & DevOps:** AWS, Docker, Nginx, GitHub Actions
- **Architecture & Concepts:** System Design, Performance Optimization, Core Web Vitals
- **Tools:** Git & GitHub, Google AI Studio, Claude

PROFESSIONAL EXPERIENCE

OZiva (HUL) — Senior Software Engineer (Apr 2026 – Present | Mumbai)

- Led the full-stack migration of OZiva's storefront from a custom Shopify theme to Shopify Hydrogen (SSR), improving PageSpeed from 20 to 75+, reducing bounce rate by 30-35%, and increasing conversion rate from ~2-3% to ~4-5%.
- Own frontend architecture and backend integrations end-to-end across React/Next.js and Node.js, driving technical decisions on scalability, caching strategy, API design, and maintainable feature delivery
- Engineered for production resilience and performance through SSR, code splitting, lazy loading, and caching, supporting 3-5x traffic spikes during high-traffic sales events without degradation.

OZiva (HUL) — Software Engineer (Oct 2022 – Apr 2026 | Mumbai)

- Built and maintained customer-facing web features end-to-end using React, Next.js, TypeScript, and Shopify Hydrogen, designing reusable components that improved delivery speed and long-term maintainability.
- Improved frontend performance and Core Web Vitals through SSR, code-splitting, lazy loading, and asset optimization, resulting in a measurably faster user experience.
- Extended feature delivery to React Native, shipping production-ready mobile experiences alongside web.
- Designed and built Node.js/Express.js REST APIs that power core customer workflows, with a focus on request validation, authentication, error handling, and reliable frontend integration.
- Integrated payment migration from GoKwik to Razorpay, covering API integration, checkout flow, payment validation, and failure handling, while reducing payment processing costs.

- Mentored 2 junior engineers and 4 interns; contributed to code reviews and engineering best practices.

Cere Labs — Software Engineer (Jun 2021 – Jun 2022 | Mumbai)

- Built and maintained internal engineering tools that streamlined developer workflows across multiple teams.
- Delivered features and resolved production issues in close collaboration with senior engineers, contributing to application stability.
- Implemented Redis caching, RabbitMQ-based async workflows, and Python (Pandas) data processing for business-critical, document-processing workloads.
- Contributed to backend API development, system integrations, and Docker-based containerized deployments.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering (2017 – 2021)

Vidyalankar Institute of Technology, Mumbai — University of Mumbai
